5 PLACE miter saw fence 1-1/2" x 1-1/2" x 96" in and flush to the wall. Measure and mark that distance from the wall and snap a chalk line on the left table to align the extended fence. Screw an 8-ft. long 2x2 into every 2x4 crosspiece with 3-in. screws, holding the right end even with the edge of the miter saw bay.

6 CUT table straightedge to line up the miter saw fence with the extended fence. Then mark the locations of the miter saw mounting holes and drill 5/32-in. pilot holes. Set the saw with two 3-in. x 1/4-in. lag screws with washers.
